DETAILED ACTION

Claim Rejections - 35 USC § 112

- 1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 2. Claims 3, 4, 5, 6, 8 and 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- 3. Claim 3 recites the limitation "the two legs" in line 2. There is insufficient antecedent basis for this limitation in the claim. Other claims 4, 6, 8 and 10 depend on Claim 3.
- 4. Claim 5: what is meant by "each time for the conductors inserted at oppositelying sides of the plug connector"?

Drawings

5. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the two conductors overlap and each leg contacting both conductors must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure

Art Unit: 2839

is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 7. Claims 1-4 and 9-10 are rejected under 35 U.S.C.102(b) as being anticipated by Glovatsky et al. (6299469).

Glovatsky (Figures 1-8B) shows a plug connector comprising a first housing half 40, a second housing half 38 which can be locked from a pre-locking position as shown in Figure 3 with the first housing half in a final locking position as shown in Figure 4 and electrically conductive clamp 58 to place two conductors (flexible ribbon conductors) 32, 36 with a plurality of conductive tracks 28, 28 in contact. The clamp is U-shaped with two legs and each leg contacts at least one conductor. The clamp is arranged in a

Art Unit: 2839

recess in the housing half 38 and the other housing half have a shoulder 42. The clamp is cutting clamp.

Claim Rejections - 35 USC § 103

- 8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 9. Claims 5-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Glovatsky et al. (6299469) in view of Bennett et al. (4900264).

Glovatsky shows all the features of these claims except a rib pressing the conductor into a recess and overlapping of the conductors. These features are well known and widely used in the art of electrical connectors. Bennett shows these features (see Figure 11). It would have been obvious to one of ordinary skill in the art at the time of the instant invention to provide these features in order to provide strain relief to both conductors as taught by Bennett.

Glovatsky does not show one of the housing half made in two parts. Bennett shows such a feature (see Figure 13). It would have been obvious to one of ordinary skill in the art at the time of the instant invention to make one of the housing half in two parts as shown by Bennett since it has been held that forming a formerly integral structure in various elements involves only routine skill in the art. Nerwin v. Erlichman, 168 USPQ 177, 179.

Application/Control Number: 10/533,468

conductors as shown by Bennett.

Art Unit: 2839

10.

Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over

Page 5

Glovatsky et al. (6299469) in view of Chishima et al. (5820404).

Glovatsky shows all the features of this claim except each leg of the clamp having two arms. Such a feature is well known and widely used in the art of electrical connectors. Chishima shows such a feature (see Figure 1). It would have been obvious to one of ordinary skill in the art at the time of the instant invention to provide such a feature because this would facilitate cutting of the insulation and securing the

Conclusion

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892 attached.
